

The problem with gambling is that it is addictive and leads to debt, bankruptcies, broken families, and crime.

If the state government would help instead of hinder businesses in CT, we could lower the unemployment which would get people off of receiving unemployment (tax expenditure) and paying taxes (tax revenue). This would be a win/win; not a lose which is what gambling would do for this state.

Wake up and reduce spending and lower taxes. This is also a win/win.
