

The parade of irresponsible ideas, suggestions, notions, beliefs, Bills, coming from State government officials prompted to stem the tide of systemic long term problems fueled by special interests and common sense bankrupt officials continues to erode the already minimized opinion of individuals elected to do the peoples work. And to do so in a responsible, honorable, manner.

YOU WORK FOR US!!!

House Bill 7054 is absolutely opposed by voting members of the Salit household.

Shame on you, the elected officials for not reigning in the special interests & realistically tackling long term financial woes.

The State should have to honestly live within it's means. Just like anyone's household.

KENO is NOT the path to financial well being. KENO would be another patch of minimal income where the societal down side plainly out weighs the pennies received.

Michael Salit
