

This Bill should not be passed, because the MLB has enough money to build five stadiums in Hartford. I understand budgets and money allocations. The State has money for certain things and doesn't have money for certain things. The money they have that could help build this stadium should go for more needy causes like pay for my tire that just got cut on Route 72 West. This little incident almost caused me to be Tased by one of the State Troopers. If those big pot holes weren't there, the opportunity for this officer acting crazy would have never occurred. These are big holes on a heavily traveled highway, I hit one and was almost (according to the officers) arrested and tased because I couldn't drive my car off the shoulder back into the highway with a flat tire.

We should be using dormant money to help the elderly with their heating bills in the winter time, and funding dental services for children in general. To waste money on a stadium that is already one hundred percent paid for is foolish and irresponsible. The MLB doesn't need Connecticut's check book to get this done. They will profit from us just because they are in the Hartford area.

But, really who is trying to be profited? A Bill is submitted to help a company that doesn't need any help. If the Bill passes, what under table amount of money will the submitter of the Bill get? Think about it a moment. Why is someone trying to be so generous? It is nothing but altruism. Please do not fill two pockets under one Bill. Kill the Bill. If you want to use that dormant money, pay for my entry door and garage doors. They need your help more than the MLB.
