

I've been informed by Senator Robert Kane that this bill 1132 offers financial assistance with tax-payers dollars for the purpose of construction of this new ball park in Hartford. I personally find this outrageous since it was first stated that no tax-payer dollars would be used in connection with this proposal. How come the sudden change, which will impact citizens of Connecticut, when it was definitely stated that no tax money would be used for this project?!

Please vote no to the use of tax money for this project.
