

Esteemed members of the CGA,

I am writing in opposition to Bill 1132 which as I understand would use state money to help fund the baseball stadium in Hartford.

This is a city of Hartford project in conjunction with the baseball team and their owners. From the beginning it was stated that they would NOT get any state funding for this project. So why is there now a bill to offer assistance. This bill should be defeated.

Our state is in enough financial trouble. We need the state money to fund the projects that the state should be responsible for, such as the roads, help for the mental health field and funding state agencies.

If the Governor and some legislators would stop squandering tax payers dollars they would not have to create new avenues of revenue and could actually produce a balanced budget.

Thank you.  
Joan Lodsin
