

NO to the above referenced bill. The Hartford and Bridgeport clubs and facilities can take of themselves. If not why are they doing what they do.

The amounts are a tiny fraction of the State budget. but still....

Some of the other gifts probably are considered "social" efforts. but still, are they really that different.

While the sums involved may very well be helpful to the privileged entities. it is still on the back of the taxpayers.

The State should keep the money and pay down its debt or use it for "operating expenses" it claims it can't afford.

There has been enough subsidies containing all types of goodies. While some have have been useful, paying off a business is somewhat sordid on the face of the transaction.
