

I have seen with dismay the decrease in maintenance of trails and controlling invasive species in our State Parks. Now I have heard that some towns are taking State land for their own use such as in Milford where they want to turn part of Silver Sands State Park into a town parking lot. A couple of years ago, the state wanted to turn some of the state park in Killington into a firing range. We need to increase Beautiful land that we have, not decrease it. We also need to hire staff to control and protect the land from illicit use. Please be part of the solution and increase funding.
