

Dear GL Committee Members:

Please vote yes on HB BILL 5780 to legalize Hemp. Your yes vote will insure new avenues of economic growth and sustainable agriculture for the CT.

It used to be grown everywhere. In fact the first Model T Ford's body was fashioned from hemp. All lines on ships were made from this natural product. Times have changed, but we need to make sense of our world today by concentrating on renewable sources, jobs and products, including clothes, building materials, food, and other industrial uses.

As a purveyor of green design, I am always looking for sensible solutions.

Thank you for your consideration in this matter.

Sincerely,
MaryLys
