

Opposition to Bill H.B. No. 6921 (RAISED) AN ACT CONCERNING INVASIONS OF PRIVACY. (JUD)

To whom it may concern on Judiciary Committee:

Please distribute to all members of State of Connecticut Judiciary Committee.

The real major problem involves "G-Stalking", gang stalking by one's own government. There are plenty of existing laws regarding civilians stalking, harassing, and harming each other.

To be put on the Police Union Black List means no protection and service from police, officers can be fired for helping those on the list, and operators of courts, personnel, prosecutors, judges, AND lawyers can't protect and serve the individual, act in the public's best interest, but may only offer no deals, maximum fines, harshest conditions and probation, and prison time for the smallest excuse.

The G-Stalking involves using police, health inspector, building inspector, sewer department, police informants, other departments, to go after the driver's license and professional licenses, and financially destroy a victim, ruin his/her credit, and send outrageous, inflated State and Federal tax bills, and charge G-Stalking victims multiple towns tax for the same vehicle. G-Stalking involves cyber stalking, destroying computer and phone functionality, and illegal domestic spying and terrorism.

I have posted a video and blog that 1000's will see. It states more of my case. Please word search Stark Raving Viking blog, and look for today's date, March 6, 2015. I, Steven G. Erickson, have been charged federal and state tax that I don't owe, was terrorized by police out of Connecticut property that I was current on my mortgages for, and out my contracting business. Police followed through with their threat to cause my divorce, permanent estrangement from my only daughter, setting me up to spend time in prison, and then kicking me out of Connecticut.

I'm asking for remedy and compensation. Please reply and answer the above and follow links on blog.

-Steven G. Erickson, PO Box Eight Seven Four, Brattleboro, VT 05302
