Subject: HB6962: AN ACT CONCERNING FIREARM SAFETY

Dear Honorable Members of the Judicial Committee,

Please consider this letter my testimony on HB6962.

I have concerns that about the wording of some sections of this bill.

The burden of proof for suitability (section 4-2) should NOT be placed on the individual.

I believe that this bill as currently marked up has the potential to be abused by many in the legal system.

It seems like the courts and law enforcement could both accuse and prosecute an individual without having to be burdened by proving anything.

Please reconsider the wording of this bill. I believe we can have a bill that respects the legal rights of all persons.

Sincerely,
Ed Daly
