Subject: Fwd: Please support Bill 668

I am writing in support of Bill 668, AN ACT PROVIDING A MEDICAL OPTION OF COMPASSIONATE AID IN DYING FOR TERMINALLY ILL ADULTS. While I do not support suicide in general when there are other options to support mental illness and thoughts of hopelessness, when there are medical conditions present that do not provide an individual with a quality of life with even a measure of what they've experience, having options are important. When dignity is diminished, living wills are explicit, and the individual with rights is of sound mind, it is an individual decision. While testimony has been presented with stories of remarkable people, I do believe in choice. If the bill is not passed, there is no choice.

Thank you.
