Subject: Opposition to HB 7015

As the daughter of elderly parents, a young sister, and many other family members and friends who benefited from hospice care and end of life palliative care, and who lived beautiful lives until they died, I beg you NOT to approve HB 7015, the so called "aid in dying" bill.

My parents, my sister and friends and family members needed no such "help" to die. With proper palliative care, they died as they lived-with dignity.

Please do not approve this bill, but join medical associations, advocates for people with disabilities, faith based communities, and millions of concerned citizens to prevent the more aptly named suicide bill from becoming law in Connecticut.

Very truly yours,
Kathleen Reilly
