Subject: Testimony regarding HB 7028

My name is Chris Duffy, and I resides in New Britain. I strongly OPPOSE HB 7028.

Time after time, our SCOTUS has ruled that a person cannot be stopped and detained without there being some kind of reasonable suspicion that a crime has, is, or will be, committed. To place a large demographic of people, 1 in 14 people has a pistol permit or long gun certificate, into a second class type discriminatory league is both wrong, and spiteful.

the first and foremost job of any Legislature is to protect their constituents. This Bil should never have even gotten this far. It is a GROSS violation of both our states Constitution, and our National Constitution. To say that this law, if passed, will be challenged in court instantly, would be an understatement. And case law tells us that the states money would be wasted on such a case, as citizens have rights.

I also would like to point out that no where in the written Bill is a single piece of factual information on how this would curb ANY violence, any crime, or do anything at all, except to strip CT residents of their 4th Amendment Rights.

I urge you to take this Bill and see it for the evil that it is. Do not let this abomination go any further. It will not do anything positive, but will have a serious negative effect.
