Subject: Supporting Senate Bill 1067

Dear Legislators,

I'm writing to you as an adult adoptee who is interested in openness with respect to documents related to the adoption process. Senate bill 1067 would ensure that birth parents have access to documents that they signed during the adoption process. The ability to have access to documents that you have signed seems like a fundamental right that should always exist. I ask that you support this legislation. Thank for your consideration of this important bill.
