

Testimony for Judiciary Committee Hearing on 03/20/2015

RE: HB-7028

I **oppose** the portion of this proposed bill pertaining to the showing of pistol permits on demand by law enforcement. Citizens should not be subject to checks of this type unless they are under suspicion of having committed a crime. Since the mere carrying of a firearm is not a crime, and law abiding citizens should not be stopped and questioned without cause, I believe that this proposal is not only without merit but is insulting to people who comply with the state's permitting process only to be looked upon with suspicion for exercising a right that is guaranteed by both state and federal constitutions.

Thank you for taking the time to consider my comments.
