

Hb no 6798 an act requiring labeling of baby food and infant formula containing genetically engineered ORGANISMS! My name is Mike G Papa. I support the labeling of **BABY FOOD AND INFANT FORMULA** containing genetically engineered organisms !! As a passionate ecological landscaper for many years I made few observations in nature ! 1) Today the people have lost the **SKILLS** of effectively manage the ecology in a way to defend the integrity of nature for the health of future generations of people !! We are endowed with the intelligence to be the **STEWART OF THIS PLANET!** But we rather settle for the **GMO** to do it for us. This is wrong ! There should be a choice as The potential **RISKS** are most ignored at this time ! We the people ask to **HAVE THE OPPORTUNITY TO MAKE A CHOICE** to at least defend the integrity of nature for the Health of the little ones ! Sincerely Mike g Papa
