

I very much support the Raised Bill number 207, which is funding for a Lyme Disease Prevention and Education Program. The award of \$450,000 to implement would be well worth the support it would give in preventing Lyme Disease in future victims. I have many friends who have this disease and it is disheartening to hear what they go through. I have stopped my nature walks and am very careful so I don't get the tick-borne disease, but I miss my nature involvement very much.

Please pass this funding as it will be a great help to prevent more people from suffering with Lyme Disease.

Irene Lambert
