

6267

Dear members of the Public Health Committee-

I am writing in favor of HB-6267. This study is long overdue. My wife Colleen Buden and two children's lives were almost destroyed partially due to a Psychological Evaluation conducted by Dr. Stephanie Stein Leite.

The eval was critiqued by Dr. Donald Hiebel (please see attached). As you can see the critique was highly critical about Dr. Stein-Leite's report. What recourse do we have when the evaluator is allowing the GAL's input to seep into her report.

The children were recommended to live in an Industrial Park and be brought up by the fathers girlfriend (the father was an executive chef and didn't have the hours to raise the kids). State Rep. Minnie Gonzalez ordered an investigation into the CLC due to the environment where those children were placed.

9 months after Stein Leite's recommendation the children were given back to Wife by the father. It was during this time on two separate occasions that the father admitted to paying for the decision. So in the State of CT you can get full custody of your children by simply buying the decision.

The father has since filed to have his parental rights terminated. This individual was who Dr. Stein Leite thought it would be best to raise these children.

I also want to note that Stephanie Stein Leite along with every other court appointed vendor including the Judge were AFCC members or as I like to put it business partners. Because trafficking children in the State of CT is a business.

Thanks,

Scott buden
