

Lisa Hall, Fairfield CT

WRITTEN TESTIMONY FOR HB6856:

Dear Members of the Public Health Committee - We cannot ignore that substance abuse is a disease and like we treat so many other diseases, we can finally work harder to prevent this one. Ambulances are supplied supplies and protocol to save lives from heart attacks and other emergencies, imagine if we were able to save lives from overdoses, instead of rushing them off to the hospital where it's usually too late. Education and better monitoring is also key to this fight as well. Kindly pass this bill, there are so many lives depending on it. Thank you.
