

6949

I am writing to urge you to oppose hb6949 an act concerning childhood vaccinations. This goes against my religious beliefs and therefore is an infringement on my first amendment rights.

I have been an Rn for 23 years and have read a vast amount of research and have seen lectures regarding the matter of vaccination and would therefore not require counseling on this matter.

Again I urge you to oppose this and help maintain our first amendment rights .

Thank you

Audra
