

1089

My name is Andrea DeCusati and I live in North Haven, CT. I understand that there are currently 19 states in the US that have licensure in relation to SB 1089, sections 23-29. I've lived in Connecticut for 22 years and I currently work at a school with autistic children. I work along side several BCBA's and BCaBA's and I feel that obtaining this license is vital to both providers and consumers of ABA services within the state of Connecticut. I hope you support this licensure and help to have it incorporated into the new Medicaid regulations to better the lives of employees and families who are directly affected.

Thank you,
Andrea DeCusati
