Hello,

My name is Caitlin Crowley and I am a Board Certified Assistant Behavior Analyst. I live in Fairfield currently but I'm from Woodbridge. I work with children with autism spectrum disorders. I love my job and being able to help my students on a day to day basis. I think it is crucial that CT instate licensure laws, as have our surrounding states, to ensure that children with special needs and their families get treatment from licensed professionals. I ask that as soon as possible, we please pass this bill! It is so important to consumers of ABA services all around the state- it is in the very best interest of those people I work with each and every day.
