

1089

To whom it may concern,

I am writing in behalf of my support of SB 1089. I am currently an instructional assistant at a private school for children with autism. I support SB 1089 sections 23-29 because I believe that BCBA's should be licensed because it will ensure consumers are getting the best possible services by qualified professionals. In addition, Medicaid will assist low income families to provide their children with the devices that they need .

Thank you for your time.
