To Whom it May Concern,

Please consider my opinion in passing the legislature to license Board Certified Behavior Analysts and Assistant Behavior Analysts in the state of Connecticut. I am currently employed at a private institution for children with autism, and we greatly benefit from the work of the BCBA's here. There are only 458 BCBA's currently employed in this state, and the amount of people that can use their help is much greater. I can vouch for the value of their positions because I witness their work on a daily basis. I appreciate your time in reading this message and I hope that it is considered.

Kind Regards,
Christina Calzadilla
Milford, Connecticut
