

To Whom It May Concern:

I urge you to support SB1089 (sections 23-29), licensure for behavior analysts. This bill will increase consumer protection for our most vulnerable populations by providing a means of regulating the practice of ABA by defining the scope of practice of provider, and protecting consumers from unqualified treatment providers. In addition, it will increase consumer access to high quality services and a consumer's ability to receive funding for necessary treatment.

Please support this important and necessary legislation. Thank you for your consideration.
