

My name is Kelsey Lisk. I live in Milford ct. I work at a private school for kids with special needs in CT. I am highly in favor of SB1089 sections 23-29. This is crucial for the students of CT who need special services. Many surrounding states have already passed a similar bill.

Families need help and do not always know which will be most appropriate. If they end up in the wrong hands (someone claiming to be a behavior specialist with official licensure) it is similar to going to a pharmacy when you need a doctor from a hospital. It is unprofessional and can be harmful to consumers who do not get the appropriate help.

There are many individuals already certified in the state who could be helping these consumers and their families.
