

1089

Hello,

My name is Michelle Olsen and I'm a Registered Behavior Technician from West Haven, Ct.

I fully support SB 1089 sections 23-29. As an RBT, I work one on one with children with Autism everyday. The BCBA's that I work with that are there to support these children work very hard and this field deserves licensure.

I feel it is very important for Autistic children to get the best quality ABA services that are available. Licensure is essential to ensure that these individuals get the best care, and are being helped by professionals who have the education to fully improve their lives. ABA therapy has the potential to really improve lives, and we need to have accountability for this field to ensure that consumers are receiving the best possible care from professionally trained individuals.

I hope you will consider my opinion, because this is an issue that is very important to the professionals in my field as well as the individuals we support everyday.

Thank you,
Michelle Olsen
