

1089

I am a Hamden, CT resident who works as a special education coordinator. Behavior analysts are an important profession in both our education and home settings. Please make services more available to lower income or those who use Medicaid. I work with students with autism and having funding for true licensed ABA can make a life long impact for these students and families. In this and surrounding states there are those that they may pose as 'behaviorists' or 'behavior specialists', this bill would make sure that services are provided by only licensed professions in this field. Please support this bill so that we can make a positive impact for CT families.

Sincerely,  
Rebecca Pleckaitis
