

1089

Good Afternoon,

My name is Victoria Williams and I am a Board Certified Behavior Analyst at a school for children diagnosed with autism. I have lived in Connecticut all my life and I am concerned about the services being provided to my fellow residents.

Nineteen states currently have licensure laws in place. It is imperative that our state pass this legislation as well. We need to ensure that families in this state get the help they desperately need and deserve from professionals with the education and experience necessary.

I urge you to consider passing SB 1089 sections 23-29 in order to help Connecticut families and to help the field of behavior analysis as it continues to grow.

Sincerely,  
Victoria Williams
