

I agree with you. there should not be any tolls put back up. It would cost too much to put them up and the amount we would get back is not going to help the roads in CT. Take the gas tax that is suppose to be used for roads and use it for that purpose.

Then take the lotto money that was suppose to help home owners with property taxes and go for public schools go there instead of the general fund.

Then the sales tax should be gone completely. That is why we have the income tax.

Our Ct. government is as bad as the Federal government as soon as they see how much money comes in on certain things they put it into the general fund and then SPEND SPEND SPEND.

Thank you
