

When tolls were eliminated the gas tax was installed. Now we have a gas tax and will probably be increased and now tolls. The only thing this state can do is raise taxes. I would really respect a government that controls it's debt. If tolls would help fix roads and bridges I would be in favor. But all the money just disappears into the general fund. Every department should have there own budget and stay within it. No tolls, no tolls, no tolls. Bob Ducharme
