

We do not need tolls on our roads. In CT for too long we have paid gasoline taxes and what happened to them? Oh, we needed to balance the budget so let's take it from the gasoline tax that is sitting there and not being used. Oh, and then let's build the busway from New Britain to Htfd. that is a drug run to Htfd. for Springfield (Drug capitol in NE) or New Haven for drugs. There are fewer people using that monstrosity than use the bus. If I was still working in Htfd. I would not go to New Britain to pick up this bus when we have them leaving Bristol. There is too much crime in New Britain to leave my car all day unprotected as well. That would be another reason that I wouldn't park my car in North Hartford to go to a Baseball game at the New Stadium.

No more taxes in CT until the Malloy gov't repays the money that they raided from the gasoline account and other accounts to balance the budgets. Then and only then would we allow a toll on the roads. The governor has raided many accounts through the years to look good on paper but in reality he has no idea how to balance a budget. Sincerely, Carol Sisson

PS I will be leaving this state in less than 2 yrs. if this governor does not straighten out the budgets and have them balance. If he needs help balancing them I can give him help in balancing the budget for DOC as there is so much waste that it is in just this department.
Carol Sisson
