

The Legislature ***MUST NOT*** pass any law to re-enact tolls as a method of taxation. The Legislature is required to treat the coffers as its own and recognize that spending reduction is the only legitimate way to solve the State's budget deficit. The mere introduction of tolls will only serve to create more leeching governmental infrastructure. Small contractors and their suppliers will be hard hit because they travel frequently during their work day and these costs will be passed on to the end user or absorbed by the contractor in order to remain competitive with stationary businesses.
