

The people of the Connecticut I-95 and Merritt Pkwy already breathe a poor quality of air.

Tolls on either of these arteries will worsen the quality of air we breathe.

You legislators went from no state tax pre 1980 to a state debt in little time.

You grow costly programs in good economic times, and don't cut them in a poor economy.

State debt is out of control and the best remedy you can come up with will worsen the health of the citizens !

Wake up and exercise the common sense God must've given you, cut programs you can't afford in this economy.

Use those funds to offset the need for tolls.

Matthew Paul
