

I am opposed to reinstalling tolls on CT state highways.

I feel that the state has created a false premise that more revenues are needed because transportation funds were swept into the General Fund in the past.

The state needs to demonstrate that current revenue streams into the transportation fund are insufficient by no longer absconding them for General Fund use, and only then should we consider reinstalling tolls on our highways.

**WE ARE ALREADY TAXED ENOUGH!** We don't have a revenue problem, we do have a spending problem!
