

The thought of having Tolls on Connecticut highways is ridiculous. This is going backwards we are already one of the least affordable states in the country to live or do business in. The state has just spent \$570,000,000 to turn an old rail bed into a 9.4 mile busway from New Britain to Hartford. (\$11,484. Per Ft.) it is this type of spending that has helped create the problem. This is just another reason why CT youth and seniors can't get out of the state fast enough they can't afford to stay. No to Tolls!!!
