

I DO NOT agree with putting tolls on Connecticut roads.

I realize Connecticut roads need repairs, but I thought the reason we had a gas tax was to pay for those repairs. We had tolls before and the roads then were in terrible shape. Which is a clear indication that having tolls will not make the roads any better.

The legislators need to stop raiding the transportation fund to pay for non-transportation related programs. If new funding is needed it needs to be spread among all citizens of the State.

It is not fair for the drivers of only particular areas of Connecticut to pay multiple times for something which never seems to be done.

Kind Regards,

Terry Rota

Greenwich CT.
