

February 11, 2015

I believe in public transportation and would like to see more available to me and friends in Norfolk, CT. A short drive to Canaan would be much more convenient than a a 45-minute journey to Wassaic, NY. My grandchildren in the New York City area come to visit and the long drive to and from Wassaic takes away from our weekend time together.

My wife and I would increase our visits to New York if we had access to the train in Canaan. We believe this would be a boon to the local area by enabling more tourism.

We are also believers in reducing auto usage to help against climate change, and this is an important step that Connecticut should take.
