

I am totally against border tolls in Connecticut. In fact I am against ANY tolls in Connecticut. The rationale for the benefits to Connecticut by having border tolls is fool hardy, short sighted and in actuality will generate more accidents as well as alternate routes will become more congested. I in particular will see more traffic in my area of Rt 39 in Danbury as people will avoid the toll and use side streets.

We cannot fix the shortfall in transportation revenues by ill conceived border tolls. The root problem is the lack of controlled spending by the Connecticut Government (ie. Democratic Congress and Governor) as well as the robbing of the transportation fund over the years and not preserving such fund.

Stop the insanity and get a grip on reality. Stop the spending abuse and fund the transportation through alternative revenue streams.

Have a Great Day !!
