

I am opposed to instituting tolls in Danbury. The negative outcomes are as follows:

Unfair taxation to local residents who use I 84 to participate in commerce and employment in Westchester County and use the train service in Brewster Ny to commute to Manhattan daily.

Totally disrupt the retail commerce in Danbury, especially the Danbury Fair Mall which generates a significant amount of revenue for the State of Connecticut

Tolls will contribute to a high volume of traffic on the secondary roads by auto drivers and commercial vehicle drivers who want to by pass the tolls.

A safety issue is always a concern as stopped traffic can contribute to accidents and excess pollution by stopped vehicles. ( not all drivers participate in the easy pass service)
