

Good Afternoon, I am Heidi Deblois and I have been going to Manchester Community College and I have had some problems with signing up for classes because of the tuition and hope you can lower it or arrange it so I can attend to college and get my degree and have great Job experience when I graduate from mcc and then go to a four year college and extend my college experiences. The financial aid you have to not fail and get an A+ or an A. So it is hard to do financial aid without failing your classes. Also with money out of pocket it can get really hard to take only one class because it costs a lot with taking two classes. So I can only take one class at a time but I can do two classes. It depends on how I am with my classes and how to maintain the homework schedule and just class and taking notes as well and studying time. So I would like to have the classes to be paid at a lower rate and be more or less stress to get my classes I deserve to take. Also I like going to mcc and have fun here and I would be sad to leave this place and not only the place but the people and the employees and my friends. Please and Thank you
