

First of all this is the third attempt of give testimony but have been rejected each time because the State's program is flawed. You want input but have not provided a user friendly program.

I will make this short since I am tired of repeating myself.

Basically not funding the Kensington hatchery would cause thousands of children to be deprived of a voluntary classroom experience salmon and trout in the classroom.

As the education chairman for CRSA I have witnessed the faces of enthused children as they raise eggs to stock in CT streams.

CT DEEP has done an amazing job of creating some of the best fishing in the whole US which brings thousands of angler here who spend \$\$\$\$\$\$\$\$\$\$\$\$\$\$. Cutting this funding is penny wise and pound foolish.

Sincerely, Gary Bogli glbogli36@gmail.com
