

Testimony for the Conserv and Dev Appropriations Subcomm re Hatchery Funding

- It would be a huge mistake to close the Kennington Hatchery and very short sighted. For a mere \$195,000 what are people thinking.
- CT is a great place to live and fishing is one of the reasons people live here and don't move out of state.
- The Hatchery supplies important fish for steams and eggs for schools, as well as jobs
- Certainly this amount of money can be spared in the budget and would cost much more to reinstate later if we close it now, we are talking about rounding error numbers, especially compared to the huge problems the state faces
