

I am writing to express my opposition to closing the Kensington Hatchery. I believe that the Atlantic Salmon fishery provides a significant benefit to the many CT residents who enjoy angling and an economic benefit to the shops who supply anglers who may come from several states to enjoy that unusual fishery. The savings that would result from closing the hatchery appear inconsequential. It seems to me that it would be in the public interest to promote conservation and environmental quality by encouraging recreational activities on our rivers and streams.

Thank you for your consideration,

Warren Stern
