

To the Appropriation Committee:

I have been with the Family School Connection Program since April 2014. My son now 6 had been getting himself into a lot of trouble at school and at home. My home visitor Fallyn has helped me and my son a lot in the past 10-11 months. She has showed me skills to deal with my son when he is misbehaving at home to help me control the situation before it stresses me out. She has given me valuable tools to use for my son to show him the rewards he can get in life by behaving and minding. Fallyn has helped me get my kids into different school that is more suitable for them which now their education is thriving. My son looks forward to his class visits he gets with Fallyn. She helps him in class to deal with his anger and emotional issues. Since dealing with the Family School Connection I have seen changes in my son including my other son. But using the techniques I have been taught I feel I have been able to become a better parent as well with learning different ways to discipline my children in a positive way. I would hate to see this program go away as it is a way to help families in need of support and direction in a positive way.

Thank you
