

State of Connecticut legislature  
Re-proposed cuts to DDS  
3/11/2015

I disagree with the governor is proposed budget cuts to DDS. I am requesting the Appropriations Committee to stop cuts to DDS. Please restore full funding to DDS and find the DDS waiting list. We have an adult child with developmental disabilities who lives with us at home. Because of funding Through DDS her day programs and special needs are met on a daily basis. There is also a home component that supports her a few hours a week In our home. Without this support we as her parents would not be able to continue our full-time employment. My daughter would also have no opportunity for socializing and further growth.
