

Appropriations Committee

I support Senate Bill 128 to control spending and to require CT government to live within the boundaries of a budget. We who have a business in the state as well as the average household has to set a budget and cut back in spending when things get tight. This is rarely done but necessary for government.

State spending is out of control and forcing people and business from the state.

Regards,

Gary J. Fappiano - CPMR / MBA
