

To Whom It My Concern,

The spending **cap** is a spending **cap**. We have to stay within or home budgets and or small business budget, why does the the state always seem to look at the tax payers to bail them out. We do not have anyone to bail us out. Start running this state like a business instead of a ending well full of money and stay within your budget. If down sizing is the answer then down size. Take a really hard look a what people are doing and see how they perform and not just show up to get paid.
