

Hi I am writing this note because I think the businesses especially the small businesses on east main and hope street in Stamford should get some form of compensation due to the construction that has been going on near their business. It is allot to ask a small business to compensate for the inconvenience to their customers and in many cases lost business that they cannot make up. So I hope this bill passes, it is much needed.

On another note my dry cleaners, my deli and my Chinese restaurant got displaced because of a CVS superstore on Hope street. I ask myself how many CVS stores are needed in a general area. This was on Hope street in Stamford Is their goal to put our the small business out of business. . Everyone talks about helping small business but it is very difficult to see how gov't helps out small business especially when that is all they talk about when they run for office.

Thank you very much, Best regards, Bob
