

Hi, My name is Joseph Costa, I live in Bridgeport and have lived in CT since I was 3 years old. I'm emailing today to show my support of HB 6288. I felt the need to reach out regarding HB 6288 because any house bill that has the ability to save a child's life deserves support. Non-medical school personnel should be allowed to administer drugs that save children's lives if a nurse is not immediately available. The longer a seizure has control of a child the more dangerous and damaging it becomes, so, to protect a child prone to seizures it makes logical sense to empower those closest to the child to administer emergency medication. Seems like a no brainer to me.

Sincerely,
Joseph Costa
